

YORK® Residential Gas Furnaces

Y92V Two-Stage,
Variable Speed,
Condensing Gas Furnaces

Variable speed for premium comfort in the home

The YORK® Y92V Two-Stage, Variable Speed, Condensing Gas Furnace offers maximum efficiency and consistent comfort for your home. Improved 97% AFUE efficiency or higher ensures no wasted energy and enables you to qualify for utility rebates and federal tax credits. The variable speed ECM blower helps to keep consistent comfort, even in the coldest temperatures.

Designed for easy installation and servicing for economical and reliable performance

- Optimized efficiency for eligibility with 25C Tax Credits, rebates and other incentives* 
- Auto-staging allows optimized two-stage operations, which help preserve the life of your equipment while providing more consistent comfort
- Compact cabinet fits in most spaces with an ideal 33in. height
- Variable speed ECM blower
- Stainless-steel secondary heat exchanger for durability and performance
- Easy configuration for upflow, downflow and horizontal applications
- Compatible with communicating two-stage and variable capacity outdoor equipment

*Contact your local YORK dealer, installer or governing authorities for specific details on qualifying for tax credits, rebates and other incentives.

 **YORK®**

NEW fold-up duct flanges

Designed for easy installation

1. Compact cabinet size designed to fit residential installations in a basement, closet, alcove, attic, recreation room or garage
2. Four-way, multi-position with rotatable inducer and internal condensate trap (condensing models)
3. No electrical knockouts to deal with saves time on installations
4. Easy access to controls to connect power and control wiring

NEW front-facing screws

Designed for easy servicing

5. Redesigned 1/4-turn knobs for easy and quick door removal
6. Front-facing screws for easy service access
7. Built-in, high-level self-diagnostics with easy-to-read fault code display
8. Optimized for CEE Tier 1 efficiency when paired with equipment for maximum rebate and tax credit eligibility 
9. New safety features include 100% shut-off for main gas valve and blower door safety switch

Designed for reliable performance

10. Variable speed ECM
11. Blower-off delay for improved efficiency performance
12. Electronic hot-surface ignition saves on fuel costs with increased dependability and reliability
13. Less than 2% airflow leakage in performance testing conditions
14. Corrosion-resistant, stainless-steel secondary heat exchanger for long-lasting performance

Designed with two-stage operation

15. Prolongs the life of your equipment
16. Minimizes temperature swings for more consistent comfort
17. Operates more quietly than single-stage equipment

Maximize the benefits of your furnace by pairing with more from our Home Comfort Systems

Enabled for hybrid systems

Pair with an efficient outdoor heat pump unit to create a hybrid system that can help save on energy costs, while being friendlier to the environment.

Indoor Air Quality (IAQ)

Choose from our wide selection of Indoor Air Quality (IAQ) products to filter, sanitize and improve the comfort of your home.

Low-GWP compliant

Our new furnaces are designed for use with R-454B, the environmentally friendlier refrigerant. Learn more about low-GWP refrigerants here:
